

BIODIVERSITY MONITORING REPORT

Species: Zebra

Scientific Name: Zaquage

Date: 2026-07-20 15:54

Population: 15

Notes: currently there 15 Zebra all looking here and

Date: 2026-07-23 11:08

Population: 8

Notes: hurodo

Date: 2026-08-12 09:49

Population: 4

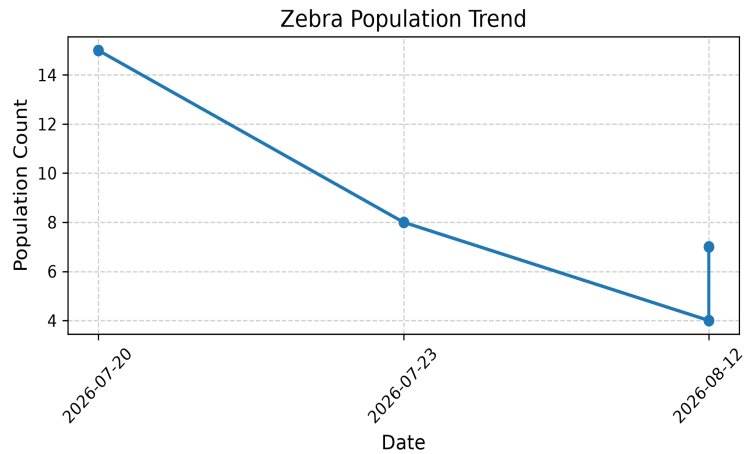

Notes: Zebra herd observed grazing in an open grassland area. Vegetation appeared healthy, with no visible signs of disturbance or injury.

Date: 2026-08-12 10:01

Population: 7

Notes: notes

Population Trend

Species: Impala

Scientific Name: *Aepyceros melampus*

Date: 2026-08-12 09:50

Population: 10

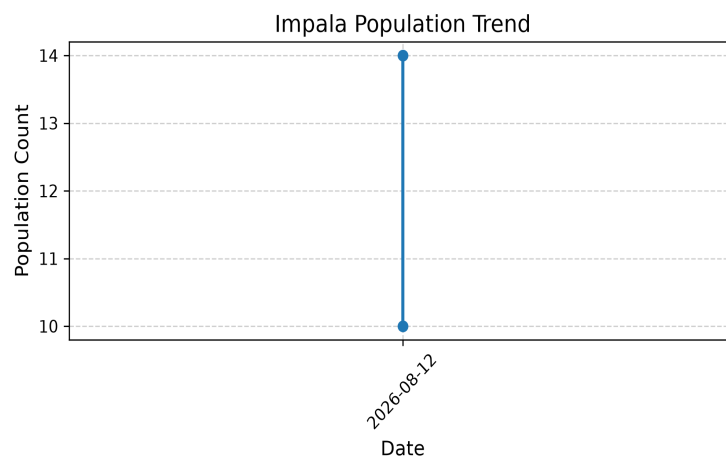

Notes: Impala observed grazing in an open grassland area. A group of approximately 12 individuals was recorded, including adults and juveniles. Vegetation was abundant and no visible signs of injury or disturbance were observed."

Date: 2026-08-12 10:00

Population: 14

Notes: Impala observed grazing in an open grassland area. A group of approximately 10 individuals was recorded, including adults and juveniles. Vegetation was abundant and no visible signs of injury or disturbance were observed."

Population Trend

Species: puku

Scientific Name: kobus vardonii

Date: 2026-08-12 09:51

Population: 8

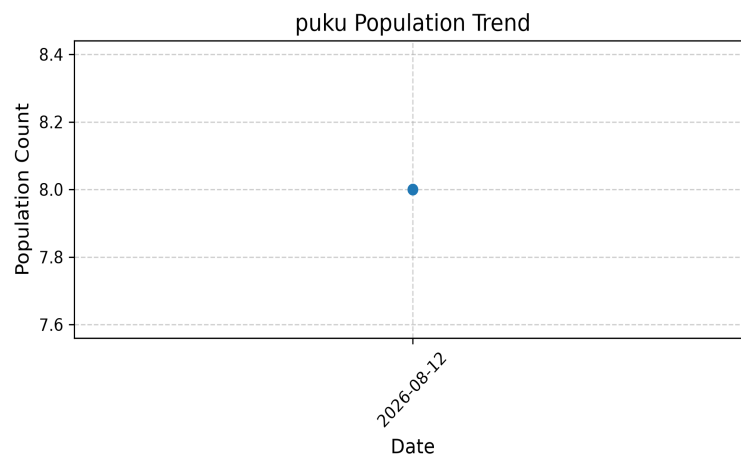

Notes: Impala observed grazing in an open grassland area. A group of approximately 8 individuals was recorded, including adults and juveniles. Vegetation was abundant and no visible signs of injury or disturbance were observed."

Date: 2026-08-12 10:00

Population: 8

Notes: "Impala observed grazing in an open grassland area. A group of approximately 8 individuals was recorded, including adults and juveniles. Vegetation was abundant and no visible signs of injury or disturbance were observed."

Population Trend

Species: Frogs

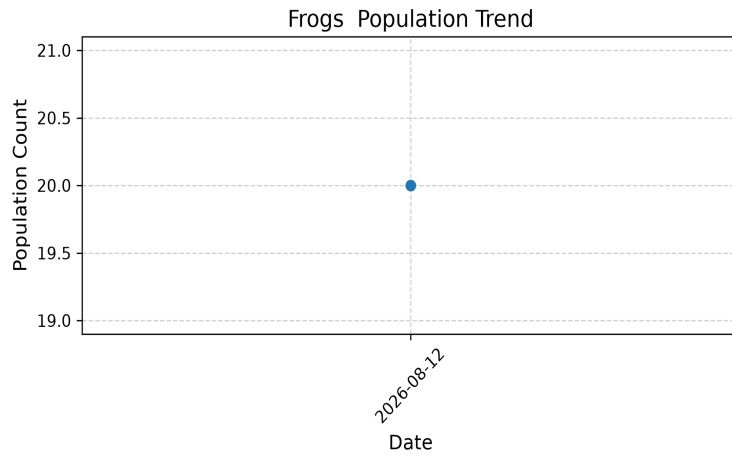

Scientific Name: anura

Date: 2026-08-12 10:09

Population: 20

Notes: growing population of frogs

Population Trend

Species: snakes

Scientific Name: serpantes

Date: 2026-08-12 10:10

Population: 1

Notes: see serpant have been spotted today
