

BIODIVERSITY MONITORING REPORT

Species: Zebra

Scientific Name: *Equus quagga*

Date: 2026-06-23 21:41

Population: 90

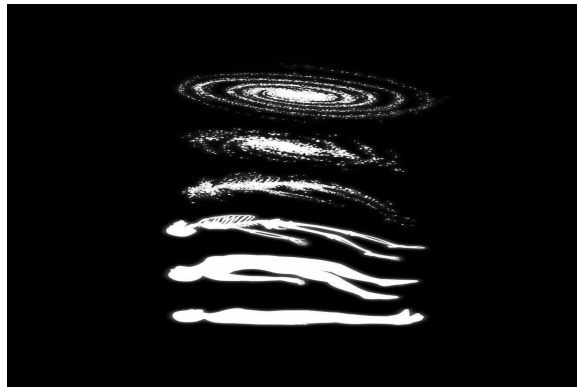

Notes: bbb

Date: 2026-06-23 22:34

Population: 7

Notes: reduced in the pupolation of zebras

Date: 2026-06-23 22:37

Population: 20

Notes: slight improvement in the population of the zebras

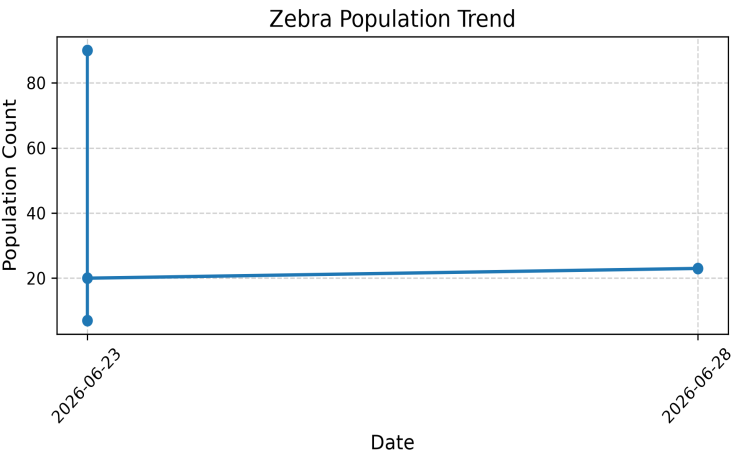

Date: 2026-06-28 13:04

Population: 23

Notes: During the scheduled wildlife census at CBU Nature Park, a systematic survey was conducted across the grassland and open woodland sections of the park to record the population and behavior of zebras. A total of 14 zebras were observed during the count. The animals were mainly distributed in a single herd occupying the central grassland area near a seasonal water drainage zone.

Population Trend

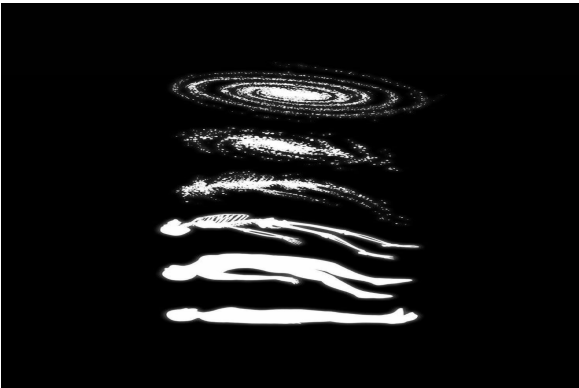

Species: Waterbuck

Scientific Name: Kobus Ellipsiprymnu

Date: 2026-06-23 21:57

Population: 8

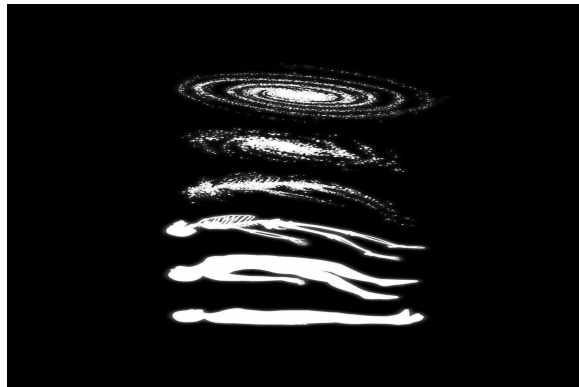

Notes: health status data was recorded physically

Date: 2026-06-23 22:02

Population: 8

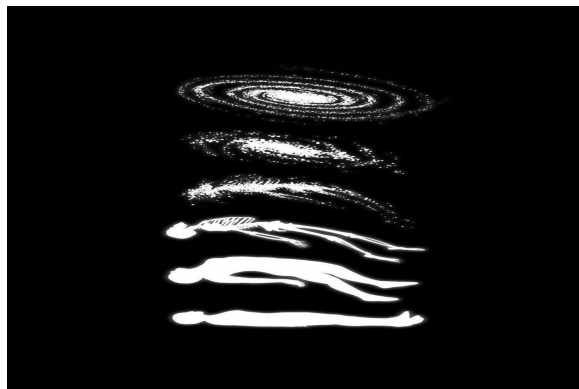

Notes: health status data was recorded physically

Date: 2026-06-23 22:12

Population: 8

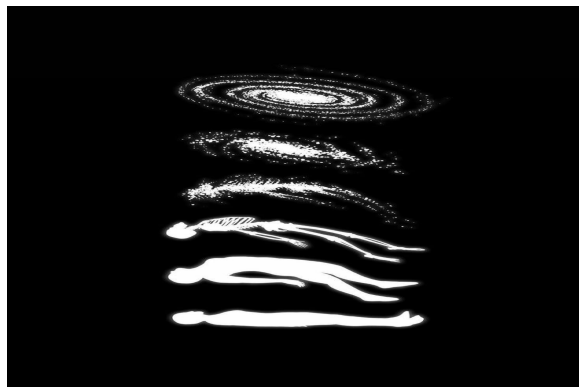

Notes: health status data was recorded physically

Date: 2026-06-23 22:12

Population: 8

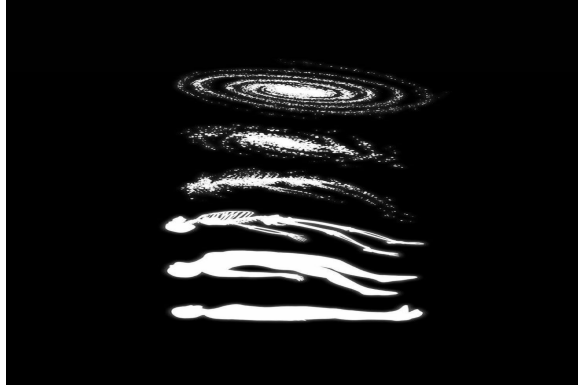

Notes: health status data was recorded physically

Date: 2026-06-23 22:13

Population: 8

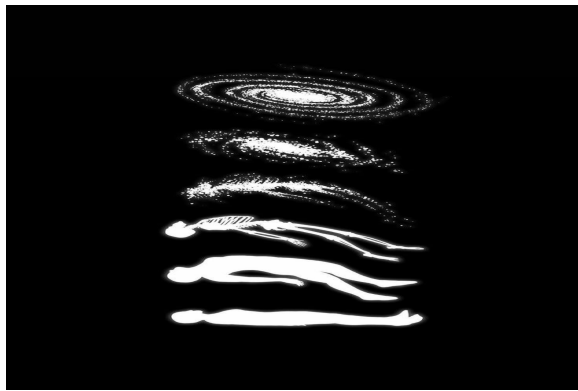

Notes: health status data was recorded physically

Date: 2026-06-23 22:14

Population: 8

Notes: health status data was recorded physically

Date: 2026-06-28 13:06

Population: 23

Notes: Observed near riverbank grazing in early morning. Small herd of about 6–8 individuals recorded. One adult male seen guarding the group. Animals remained close to water and retreated into bush when disturbed. Overall condition: healthy, no visible injuries.

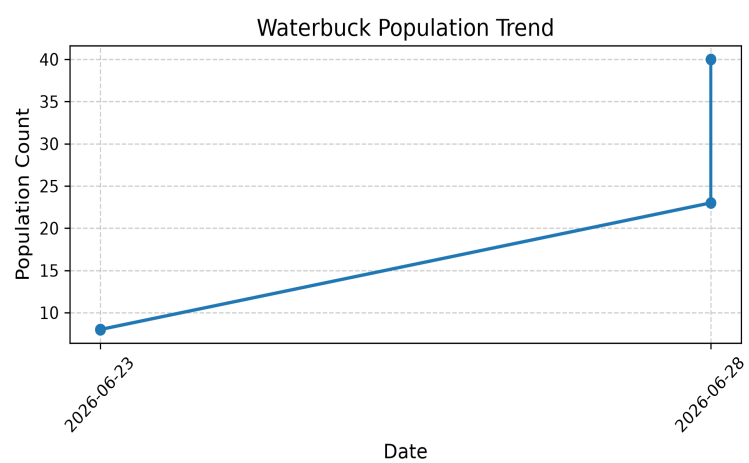

Date: 2026-06-28 13:08

Population: 40

Notes: Large herd (~25–40 individuals) observed in open savanna. Active grazing with frequent movement between grass patches. Several males engaged in light sparring behavior. High alertness observed due to nearby predator signs. Population appears stable in the area.

Population Trend

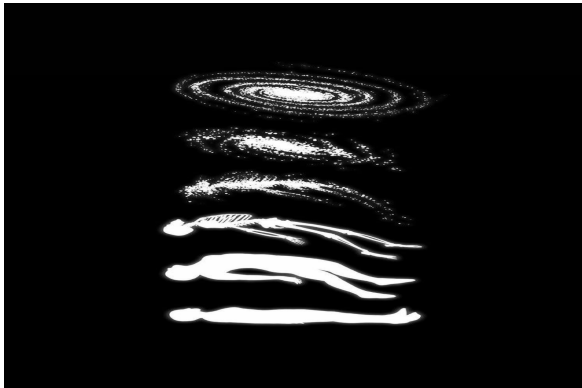

Species: impala

Scientific Name: Aepyceros

Date: 2026-06-23 22:34

Population: 12

Notes: reduced in the pupolation of zebras

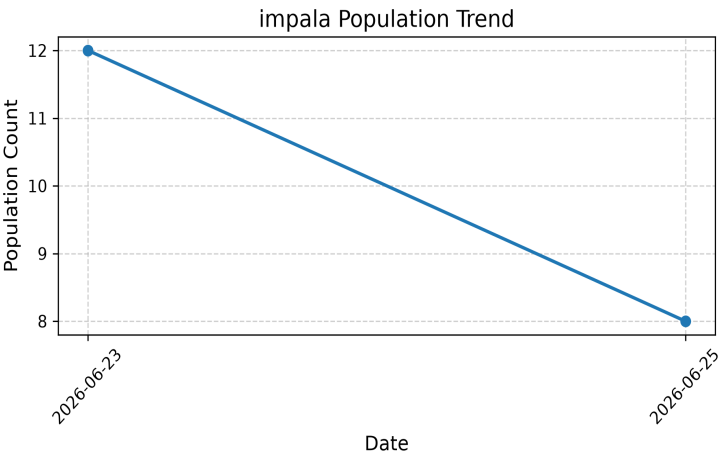

Date: 2026-06-25 11:13

Population: 8

Notes:

Population Trend

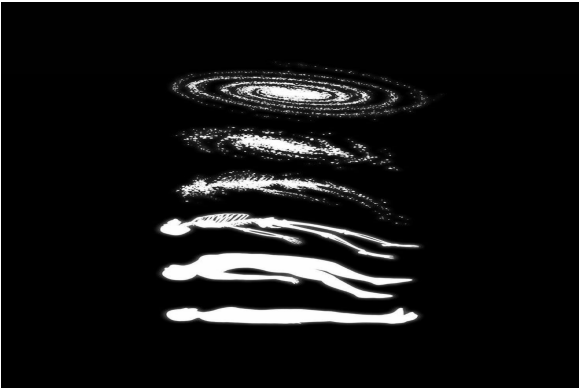

Species: Eland

Scientific Name: Taurolaghus Strepsiceros

Date: 2026-06-23 22:35

Population: 26

Notes: maintained the pupolation

Date: 2026-06-28 13:08

Population: 40

Notes: Large herd (~25–40 individuals) observed in open savanna. Active grazing with frequent movement between grass patches. Several males engaged in light sparring behavior. High alertness observed due to nearby predator signs. Population appears stable in the area.

Date: 2026-06-28 13:09

Population: 30

Notes: Small group of 4–6 individuals spotted at woodland edge. Slow, steady grazing behavior observed. One dominant adult male present with large spiral horns. Animals appeared calm and less reactive to disturbance. Low population density compared to other species.
